Collection of

Ancient Greek and Roman Coins

In Gold Silver and Copper

COLLECTED BY

MR. BENJAMIN LOVE

OF PHILADELPHIA.

HIS collection is the result of many years collecting having been weeded out time and time again, until now the examples contained therein are about as perfect as it is possible to get them. The Greek Coins display the very earliest examples of coinage and are unusually fine, whilst the Roman Coins include the entire series, Consular (Family Coins) and Imperial, and showing not only the rise and decline of Roman Coinage, but also prove that despotic institutions can replace democratic, without change in forms or names.
